SUBJECT INDEX TO VOLUME 9

Abortion counseling, physician,s role in, 69
Alternative care, case management programs, 174
Ambulatory assessment program, nurse telephone screening, 14
Arthritis self-help course, 60
Aspirin, the wonder drug that works wonders, 147
Automated medical records, patients' response, 182
Behavior intervention programs, arthritis self-help, 60
  behavioral medicine pain program 62
  pain management program, 57
  personal health improvement program, 59
  smoking intervention, 61
Behavioral disorders, an unrecognized epidemic, 53
Behavioral medicine, and the primary care provider, 64
  arthritis self-help course, 60
  behavioral disorders, an unrecognized epidemic, 53
  developing a program, 65
  in the mainstream of primary care, 51
  pain management program, 57
  pain program, 62
  personal health improvement program, 59
  smoking intervention, 61
Biopsychosocial model, behavioral disorders, 53
Breast cancer care, change leads to improvement, 75
Care delivery systems, an integrated continuum, 40
Care Management, nurse telephone screening of new medicare members, 14
  of patients with diabetes by nurses, 8
  beyond the benefit package, 179
  case management programs, 174
Case-mix, developing a system for automated monitoring of psychiatric outpatients, 162
Chiropractic services, in HMOs, 35
Chronic disease management, behavioral disorders, 53
Clinical and outcomes research, HMO physician attitudes toward drug cost containment strategies, 116
  practicing population-based care in an HMO, 101
  primary care HMO clinicians' opinions about clinical practice guidelines, 111
  small group consensus process for changing physician practices, influenza vaccination, 106
  developing a system for automated monitoring of psychiatric outpatients, 162
  HMO family physicians, men and women differ, 155
Clinical epidemiology, management of patients with diabetes, 8
  practicing population-based care in an HMO, 101
Clinical intervention, health plans helping smokers, 128
  smoking cessation programs using telephone intervention and group sessions, 134
Clinical practice guidelines, primary care HMO clinicians' opinions about, 111
Clinician attitudes, about clinical practice guidelines, 111
Community health centers, United Health Plan bridges gap between HMOs and, 71
Computerized patient records, patients' response, 182
Computing systems, management of patients with diabetes, 8
  practicing population-based care in an HMO, 101
Cost containment, HMO physician attitudes toward drug cost containment strategies, 116
Cost-effective care, case management programs, 174
Costs and cost analysis, technology assessment at the Institute for Clinical Systems Integration, 22
Depression, identifying symptoms among elderly medicare HMO enrollees, 168
Diabetes patients, management of by nurses with support of subspecialists, 8
Difficult patients, managing to reduce malpractice risk, 84
Elderly, identifying depressive symptoms among medicare HMO enrollees, 168
  nurse telephone screening of new medicare members, 14
Electronic patient records, patients' response, 182
Evidence-based medicine, Aspirin, 147
Gender difference, HMO family physicians, men and women differ in their work, 155
Geriatric care, progress in, 27
  the need for integrated care, 31
Health education, best practices, 32
  technology assessment at the Institute for Clinical Systems Integration, 22
Health improvement, personal, behavior intervention programs that work, 59
Health Maintenance Organization (HMO) physician attitudes toward drug cost containment strategies, 116
  practicing population-based care in an, 101
  Chiropractic services in, 35
  health plans helping smokers, 128
  identifying depressive symptoms among elderly medicare enrollees, 168
  mainstreaming efforts to decrease tobacco use in, 138
  management of patients with diabetes by nurses, 8
  nurse telephone screening of new medicare members, 14
  nurses in, 3
  primary care clinicians' opinions about clinical practice guidelines, 111
  psychiatric day hospital program in, 79
  small group consensus process for changing physician practices, influenza vaccination, 106
  smoking cessation programs using telephone intervention and group sessions, 134
  United Health Plan bridges gap between HMOs and community health centers, 71
Health policy, United Health Plan bridges gap between HMOs and community health centers, 71
HMO research, the current status of, 97
Hyperemesis gravidarum, improving management, 19
Influenza vaccination, small group consensus process, 106
Interdisciplinary team, case management programs, 174
Managed care, shift to managed health, 91
Managed health, shift from managed care, 91
Managing & improving quality, change leads to improvement in pediatric asthma and breast cancer care, 75
  improving management of hyperemesis gravidarum, 19
Maternity care, conference in, 189
Medical care, manage the difficult patient to reduce malpractice risk, 84
Medical malpractice, manage the difficult patient to reduce risk, 84
Medical staff, the role of in a changing marketplace, 66
Medicare, identifying depressive symptoms among elderly HMO enrollees, 168
  nurse telephone screening of new members
Mental health/substance abuse, identifying depressive symptoms among elderly medicare HMO enrollees, 168
  psychiatric day hospital program in an HMO, 79
Monitoring of psychiatric patients, developing a system for, 162
Nicotine dependence, mainstreaming efforts to decrease tobacco use in an HMO, 138
Nurses, in HMOs, 3
Nursing care, telephone screening of new medicare members, 14
Nutrition, the benefits of a home parenteral team, 37
Pain management, behavior intervention programs that work, 57
Parenteral nutrition, the benefits of a home parenteral nutrition team, 37
Partial hospitalization, psychiatric day hospital program in an HMO, 79
Patient care management, case management programs, 174
Patient satisfaction, patients' response to computerized patient records, 182
Pediatric asthma care, change leads to improvement in , 75
Physician attitudes, toward drug cost containment strategies, 116
Physician practice pattern, small group consensus process for changing, influenza vaccination, 106
Physician workload, HMO family physicians, men and women differ, 155
Policy and Practice, manage the difficult patient to reduce malpractice risk, 84
  intertwined roles of primary care physicians and specialists, 186
  patients' response to computerized patient records, 182
Population-based medicine, emergence of, 120
Pregnancy, improving management of hyperemesis gravidarum, 19
Prescription drugs, HMO physician attitudes toward cost containment strategies, 116
Preventive care, management of patients with diabetes, 8
  practicing population-based care in an HMO, 101
Primary care physicians and specialists, future, 152
  intertwined roles, 186
Primary care, behavioral medicine in the mainstream of, 51
  behavioral medicine, and the primary care provider, 64
  encouraging research by clinical staff, 192
  HMO clinicians' opinions about clinical practice guidelines, 111
Professional liability, manage the difficult patient to reduce malpractice risk, 84
Psychiatric day hospital, program in an HMO, 79
Quality improvement projects, change leads to improvement in pediatric asthma and breast cancer care, 75
Quality improvement, developing a system for automated monitoring of psychiatric outpatients, 162
  mainstreaming efforts to decrease tobacco use in an HMO, 138
Risk management, of the difficult patient to reduce malpractice risk, 84
Self-care, use of self-care manual shifts utilization pattern, 88
Small group consensus process, for changing physician practices, influenza vaccination, 107
Smoking cessation intervention, telephone, 144
Smoking intervention, behavior intervention programs that work, 61
Smoking cessation, mainstreaming efforts to decrease tobacco use in an HMO, 138
Smoking, cessation programs using telephone intervention and group sessions, 134
  health plans helping smokers, 128
Stress, behavioral disorders, 53
Symptomatology, identifying depressive symptoms among elderly medicare HMO enrollees, 168
Technology assessment, at the Institute for Clinical Systems Integration, 22
Technology management, technology assessment at the Institute for Clinical Systems Integration, 22
Tobacco use, prevention and control in HMOs, commentary, 139
  conference report, 123
  health plans helping smokers, 128
  mainstreaming efforts to decrease use in an, 138
  smoking cessation programs using telephone intervention and group sessions, 134
  telephone smoking cessation intervention, 144
Tobacco, mainstreaming efforts to decrease use in an HMO, 138
Utilization management, nurse telephone screening of new medicare members, 14
Utilization Pattern, use of self-care manual shifts , 88
Workers' Compensation, change of system in HMOs, 34
